# Airline Feeder Delay Refused

United States Civil Aeronautics Board informed supervisors Monday that it had denied a request for postponement of decision on applications for certificates to supply feeder airline service in Riverside county.

Supervisors last month had adopted a resolution protesting a delay in the decision and the CAB's word to the board was in reply to their action.

The Southwest Airways company filed the motion for postponement last month. It asked the board to "defer final decision in the Bonanza Air Lines Certificate Renewal Case for simultaneous decision with Southwest Airways Co. Certificate Renewal Case."

The board said that the denial was "without prejudice" and that the motion could be submitted again later.

The board did not say when it expects to reach a final decision. Edmund Converse, president of Bonanza Airlines, has said a decision might be handed down by June 1 if there is no postponement.
